

# Welcome!

This is the third in a series of teaching aids designed **by** teachers **for** teachers at level 4. The worksheets are designed to support the delivery of the National Curriculum in a variety of teaching and learning styles. They are not designed to take the pedagogy away from the teacher. The worksheets are centred around the shown level, but spiral from the level below to the level above. Consult the National Numeracy Strategy for definitive National Curriculum levels. They can be used by parents with the support of the on-line help facility at [www.10ticks.co.uk](http://www.10ticks.co.uk).

- Pages 25/26. **Timetables.**  
Using skills in both time calculation and reading from tables. Reading from train and bus timetables.
- Pages 27/28. **Metric Units-Length.**  
Interchanging units of length.
- Pages 29/30. **Metric Units-Weight/Capacity.**  
Interchanging units of weight/interchanging units of capacity.
- Pages 31/32. **Measuring Metric Units.**  
The first exercise is measuring to the nearest mm on the sheet. The second will need some planning, depending on which measuring instruments you have in your department. It will need to be discussed as to which measuring instrument is appropriate to which distances. Pupils should be encouraged to estimate distances first before measuring.  
Weights and capacities are always difficult in secondary school due to the expense of the measuring devices and nature of measuring. Hence the "Weights and Capacities at Home" section. Finally "My Measurements". This encourages pupils to discover their own personal measurements. Be sensitive to some pupils, they may not appreciate their weight being broadcast.
- Pages 33/34. **Adding and Subtracting Metric Units 1.**  
This sheet deals only with metric lengths.
- Pages 35/36. **Adding and Subtracting Metric Units 2.**  
This sheet deals with the other metric units.
- Page 37. **Multiplying Metric Units.**  
Multiplying all the metric units by numbers up to 10.
- Page 38. **Dividing Metric Units.**  
Dividing all the metric units by numbers up to 10.
- Pages 39/40. **Metric Units (Worded Questions).**  
All the above skills put into context.
- Page 41. **Walk the Plank.**  
Game to consolidate the skills working between metres and centimetres **and** subtraction of the units.
- Page 42. **Raise the Tiny-Tanic.**  
Game to consolidate the skills working between litres and millilitres, addition of the units and multiplication skills.

## Place Value.

### A). Place Value.

Every number is made up of digits, and each digit has an "invisible" place value heading over it.

M	HTh	TTh	Th	H	T	U
4	7	1	9	8	3	2

We normally don't write these headings.

Here are what the letters stand for.

M - millions; HTh - hundred thousands; TTh - ten thousands; Th - thousands;  
H - hundreds; T - tens; U - units.

These headings tell what each part of the number is worth. E.g. in the number above, the 8 has a value of eight hundred and the 7 has a value of seven hundred thousand.

When we write in the place value headings we always start from the units digit and work from right to left.

For the following numbers write in the place value headings, **and** write the value of the digit underlined.

Write the following numbers in figures.

- |                                  |                                |                                    |                                  |
|----------------------------------|--------------------------------|------------------------------------|----------------------------------|
| 51). Forty nine                  | 52). Sixty eight               | 53). Fifteen                       | 54). Eighty seven                |
| 55). Two hundred and twenty five | 56). Nine hundred and eighteen | 57). Seven hundred and forty three | 58). Six hundred and thirty four |
| 59). One hundred and two         | 60). Three hundred and eight   |                                    |                                  |

- 61). Four thousand six hundred and twelve  
 63). Two thousand four hundred and sixty one  
 65). Seven thousand one hundred and ninety two  
 67). Six thousand seven hundred  
 69). Eight thousand and fifty  
 71). Twenty six thousand four hundred and sixty two  
 73). Nineteen thousand six hundred and twenty five  
 75). Ninety one thousand five hundred and sixty seven  
 77). Sixty two thousand six hundred and nine  
 79). Forty thousand and fifty six
- 81). Nine hundred and fifty two thousand six hundred and eighty two  
 82). Six hundred and fifty eight thousand seven hundred and eighteen  
 83). Two hundred and thirteen thousand nine hundred and forty two  
 84). Seven hundred and thirty two thousand five hundred and seventy eight  
 85). One hundred and ninety eight thousand four hundred and thirty six
- 86). Five hundred thousand      87). Half a million      88). Quarter of a million  
 89). Two hundred and fifty thousand      90). Three quarters of a million
- 91). Four hundred and three thousand six hundred  
 93). Eight hundred and fifty thousand and twelve  
 95). Six million five hundred thousand  
 97). Eight million thirty two thousand and fifty  
 99). One million fifteen thousand and eight
- 92). Six hundred thousand two hundred and one  
 94). Nine hundred thousand one hundred and four  
 96). Four million two thousand and seven  
 98). Two and a half million  
 100). Nine million forty thousand and nineteen

### C). Ordering numbers.

Put the following numbers in **ascending** order (smallest to biggest).

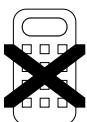

- 1). 57, 48, 61, 19, 73.      2). 28 83, 91, 47, 74.      3). 86, 39, 90, 37, 68.  
 4). 68, 105, 87, 37, 94.      5). 57, 116, 86, 109, 75.      6). 98, 175, 205, 89, 116.  
 7). 148, 205, 615, 198, 337.      8). 847, 609, 734, 458, 660.      9). 920, 806, 785, 699, 845.  
 10). 1035, 1305, 1503, 1530, 1350.  
 12). 2344, 2434, 3244, 4423, 3424.  
 14). 7048, 8407, 8704, 7840, 8074.  
 16). 34451, 35144, 43415, 53144, 35441.  
 18). 25683, 28653, 26853, 28356, 26358.  
 20). 74380, 73804, 78403, 74803, 73840.  
 22). 437671, 376714, 374761, 417367, 436177.  
 24). 463029, 429203, 439029, 469230, 429302.  
 26). 170603, 163007, 137600, 163070, 170063.  
 28). 2316746, 3124667, 1766432, 2316674, 1667423.  
 30). 5678463, 5687643, 5487663, 5834667, 5738464.  
 32). 1004532, 1025403, 1050234, 1004234, 1020543.  
 34). Half a million, 97356, 679032, 1534368, 78978.  
 36). 579234, 85935, 929673, three quarters of a million, 1003472, 743689, 98754.

For each of the following questions, use the digits given **only once** to make

- a). the biggest number possible, **write this in figures and words**.  
 b). the smallest number possible, **write this in figures and words**.

- 37). 6, 2, 5, 9.      38). 6, 4, 8, 1.      39). 7, 0, 1, 8.      40). 4, 0, 0, 6.  
 41). 7, 2, 6, 9, 3.      42). 2, 7, 8, 2, 6.      43). 8, 6, 2, 6, 0.      44). 8, 5, 8, 3, 1.  
 45). 0, 4, 1, 7, 5, 6.      46). 8, 3, 6, 9, 1, 0.      47). 9, 3, 6, 1, 7, 7.      48). 4, 6, 4, 0, 0, 9.  
 49). 7, 2, 7, 3, 8, 7, 2.      50). 7, 5, 0, 3, 9, 4, 1.      51). 6, 0, 2, 1, 8, 5, 0.      52). 8, 3, 2, 7, 4, 8, 5.

## Multiplying and Dividing by 10, 100, 1000....

A). Multiply the following by **10**.

- |             |             |             |             |             |

# Zap to Zero (Place Value).

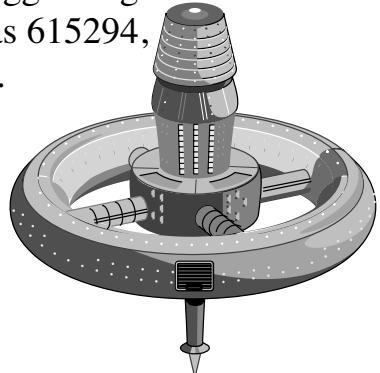

The aliens are coming to town.

The only way to annihilate them is to **zap them to zero**.

Captain Slog keeps careful records of every alien's number he zaps.

He is very orderly about it. He always zaps the smallest digit first in the alien's number. He then works his way up to the biggest digit.

His last encounter was with the alien formerly known as 615294, a cheeky green chappie from the planet Geek.

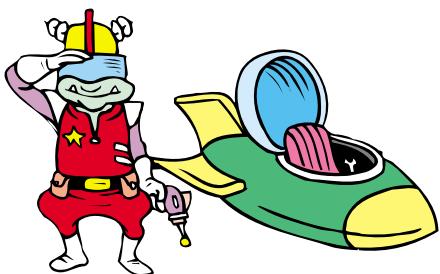

Here is Captain Slog's Log.

*Aliens Trashed!*

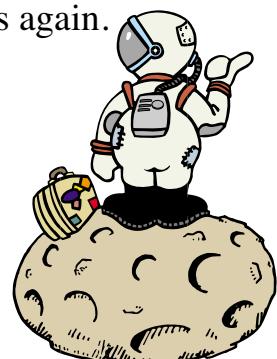

Here are the Captain's Rules of Encounter.

- 1). Enter the alien's number into your calculator.
- 2). You zap an alien by turning it into zeros.
- 3). You can only zap an alien by **subtracting**.
- 4). The alien's number has to be zapped from smallest to biggest digit.
- 5). All zapping must be recorded in Captain Slog's Log in figures **and words**.
- 6). **Only the brave survive.**

Oh dear those naughty Geeks are attacking Earth's defences again.  
Captain Slog is on holiday.  
Only you can help.

*Be ruthless.*

Here are the names of the "alien eight".

Put a penny on **Start**. Push it forward with your nail.  
The number it lands on is how many points you score.  
If it touches any lines you get **+1** point.  
To record your score place a counter at 0 on your score line.  
Move your counter up or down the number of points you scored.  
Take it in turns to go. The first to get to **-15** points wins.

## The Lift.

Here is a diagram of a lift that services this building.

The lift is run from the control panel below.

The control panel is different from the usual lift control panels.

If I wanted to go from Basement 1 to the 3<sup>rd</sup> Floor, I'd press **+ 4**.

If I wanted to go from the 4<sup>th</sup> Floor to Car Park 2, I'd press **- 8**.

- 1). What buttons would I press on the lift control panel if I wanted to go from
  - a). Car Park 3 to Basement 2,
  - b). Car Park 1 to the Ground Floor,
  - c). 1<sup>st</sup> Floor to 5<sup>th</sup> Floor,

## Money and Your Calculator.

Calculators do not show amounts of money in the usual way.

They show the amount of pounds or pence on the display.

Here is how to enter money in to your calculator.

Amount of money.

Buttons pressed on the calculator.

The display shows this.

£ 2.03

2 □ 0 3 =

2.03

57p

5 7 =

57

£ 3.40

3 □ 4 0 =

3.4

The calculator does not know you are doing money calculations.

So £ 3.40 is written 3.4. The calculator puts this number as a simple decimal.

If you enter an amount in pounds, the answer will be in pounds.  
If you enter an amount in pence, the answer will be in pence.

A. Write down the buttons you have to press on a calculator to show the following amounts of money.

- 1). £ 2.58    2). £ 3.42    3). £ 5.63    4). £ 6.37    5). £ 4.05

  - b). 08 35 Belcot bus to go from Belcot to Henby,
  - c). 13 26 Neston bus to go from Neston to Henby,
  - d). 22 05 Pinley bus to go from Pinley to Wilton ?
  
- 7). a). I get to Pinley Terminal at 09 30. What is the earliest time I can arrive in Wye Spa ?
  - b). I get to Podton Terminal at 16 15. What is the earliest time I can arrive in Menster ?
  - c). I get to Belcot Terminal at 13 00. What is the earliest time I can arrive in Pooting ?
  - d). I get to Menster Terminal at 15 45. What is the earliest time I can arrive in Pooting ?
  
- 8). a). I need to be in Henby by 11.55. What is the latest bus I can catch from Pinley ?
  - b). I need to be in Wilton by 17 05. What is the latest bus I can catch from Wye Spa ?
  - c). I need to be in Pooting by 20 00. What is the latest bus I can catch from Menster ?
  - d). I need to be in Menster by 16 00. What is the latest bus I can catch from Belcot ?
  
- 9). a).
  - i). Which is the quickest journey between Pinley and Pooting ?
  - ii). How long does this take ?
 b).
  - i). Which is the slowest journey between Pinley and Pooting ?
  - ii). How long does this take ?
 c). What is the difference in time between the quickest and slowest journey between Pinley and Pooting ?

## Metric Units -Lengths.

A). Change the following to millimetres (mm).

$$1 \text{ cm} = 10 \text{ mm}$$

# Measuring in Metric Units.

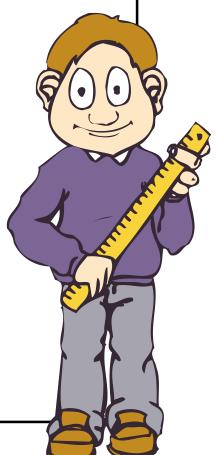

- 1). Measure the lines below. Give your answer in centimetres and millimetres, e.g. 6 cm 4 mm.

a). \_\_\_\_\_ b). \_\_\_\_\_  
 c). \_\_\_\_\_ d). \_\_\_\_\_  
 e). \_\_\_\_\_ f). \_\_\_\_\_  
 g). \_\_\_\_\_ h). \_\_\_\_\_

 m). \_\_\_\_\_ n). \_\_\_\_\_  
 o). \_\_\_\_\_ p). \_\_\_\_\_

- 2). a). Copy the table below. You are going to measure each of the objects in the table.  
 You will have to make these choices when you fill in the table :  
 i). Which measuring instrument you will use (your teacher will show you what you can choose)?  
 ii). Which metric units you will be measuring in?  
 Now make an estimate of the length you are measuring and complete the table.

Object	Measuring Instrument used	Metric Units used	Estimate	Actual
Length of Classroom Table				
Length of Exercise Book				
Height of Door				
Height of Blackboard				
Height of Chair				
Width of this Worksheet				
Length of Classroom				
Thickness of Exercise Book				
Width of Table				
Width of Classroom				
Length of Light Switch				
Width of Light Switch				
Width of Finger Nail				
Width of Exercise Book				
Width of Door				
Length of Pencil				
Thickness of a Rubber				
Width of Blackboard				

- b). Now find another 10 lengths to be measured in the classroom.

## Weights.

- A). Copy the table below. You are going to weigh each of the objects in the table.  
You will have to make these choices when you fill in the table :
- 1). Which measuring instrument you will use (your teacher will show you what you can choose)?
  - 2). Which metric units you will be measuring in?
- Now make an estimate of the weight, weigh it and then complete the table.

Object	Measuring Instrument used	Metric Units used	Estimate	Actual

- B). Now find 10 other objects to weigh around the class.

## Weights and Capacities at Home.

- A). Find each of the following objects at home. Now write down this information about it:-
- a). if it is measured by weight or capacity ,
  - b). its weight/capacity,
  - c). the units in which it is measured.
- 1). Packet of Crisps      2). Bottle of Lemonade      3). Bag of Sugar      4). Box of Cornflakes  
 5). Washing Up Liquid      6). Bread      7). Bottle of Milk      8). Can of Soup  
 9). Jar of Jam      10). Can of Beans      11). Margarine Tub      12). Toothpaste.
- B). Find out this information for another 10 objects around the house.

## My Measurements

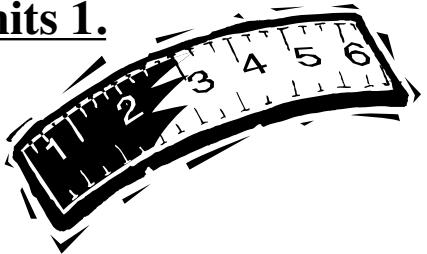

Find out these measurements about yourself.

- 1). Stretch out your arms wide. Measure from finger tip to finger tip.
- 2). Height. What do you notice about your height and the measurement above ?
- 3). Width of your thumb finger nail.
- 4). Weight.
- 5). Circumference around your head. Measure from the very top of your nose all the way around.
- 6). Stride. Mark a point and stride from that point.
- 7). Shoe size.
- 8). Foot length. Take off your shoe and measure from your heel to the end of your big toe.
- 9). Front teeth. Measure from top to bottom of one of your front teeth.
- 10). Standing jump. Mark a point. Put your feet together and jump. Measure this distance.
- 11). Length of nose.
- 12). Hand span. Spread out your fingers as wide as they can go. Measure from little finger to thumb.
- 13). Length of your middle finger.
- 14). Length of your hair.
- 15). Smile. Do a big smile and measure from one side to another.
- 16). Arm length. Measure from your arm pit to the end of your fingers.

## Metric Units. Worded Questions.

- 1). Lesley has a plank of wood 4 m 35 cm long. She is going to cut it into 5 equal pieces to make shelves. How long will each shelf be ?
- 2). Bob buys apples. Each apple is 212 g. He wants 8. What will the total weight be in Kilograms and grams ?
- 3). Billy has 4656 ml of lemonade. How many litres and millilitres is this ?
- 4). Sam collects worms that are exactly 3 cm 2 mm long. He has 9 in his collection. If he puts them end to end how long will they all be in total ?
- 5). A huge field is 3 Km 983 m long. A hedge runs along one side that is to be looked after by 7 farmers. If they all look after equal portions, what length does each farmer look after ?
- 6). Alison has 6 m 56 cm of curtain material. She needs to know the length in centimetres only. What is it ?
- 7). Ron buys a 1 Kg 544 g bag of apples. There are 8 equal sized apples in the bag. What is the weight of each apple ?
- 8). A bus travels 5 Km 314 m. Matthew gets off half way. How far did he travel on the bus ?
- 9). Lauren has a 2 litre bottle of lemonade. She drinks 214 ml . How much has she got left ?
- 10). James has a washing line 5 m 45 cm long. What is that in centimetres ?
- 11). Builders are building a wall. At the end of the first day it is 1 m 34 cm tall. The second day they add another 89 cm to its height. How tall is the wall now ?
- 12). A piece of wood is 3 m 76 cm long. It is shortened by 85 cm. How long is the wood now ?
- 13). Jimmy jogs 7 Km 98 m. How far is this just in metres ?
- 14). Give a good estimate of your height in metres and centimetres.
- 15). A snail called Sam travels 7 cm 5 mm and has a rest and a lettuce leaf. He then travels another 9 cm 8 mm. How far has Sam moved all together ?
- 16). The wood work teacher has a piece of wood exactly 2 metres long. He asks the class this length in millimetres. What is it ?
- 17). A pen top is weighed very accurately. It is 2 g 243 mg. What is this just in milligrams ?
- 18). A tree is 3 m 45 cm tall. It is measured 3 years later and found to be 5 m 12 cm tall. How much has it grown in this time ?
- 19). Give a good estimate of your weight in Kilograms.
- 20). David buys 4 cans each containing 330 ml of cola. How much cola has he in total in litres and millilitres ?

- 21). 4 equal sized pen tops weigh a total of 13 g 624 mg. What is the weight of one of them ?
- 22). 6 Chairs each weighing 4 Kg 326 g are to be posted to a school. The cost of postage depends on the weight of parcel. What is the total weight of these chairs ?
- 23). A barrel of water has 8 l 642 ml in it. It gets a leak and loses 978 ml. How much water is now left in the barrel ?
- 24). A piece of ribbon 33 cm 6 mm long is to be cut into 7 equal pieces to make badges. How long will each piece of ribbon be?
- 25). Billy is baking. He takes flour out of a full 2 Kg bag. He uses 250 g. How much flour is there left in the bag ?
- 26). Susan cycles 6 km 645 m and has a rest. She then cycles another 12 Km 804 m. How far has she cycled in total ?
- 27). Keith has 3 tonnes of scrap metal. How many kilograms is that ?
- 28). Kate weighs 37 Kg 500 g, Beth weighs 34 Kg 765 g. What is their total weight ?
- 29). William weighs 67 Kg 745 g. He goes on a diet and loses 7 Kg 279 g. What is his new weight ?
- 30). How many millimetres are there in 12 cm 7 mm ?
- 31). Give an estimate of the length and width of your classroom.
- 32). Rover cycles 12 Km 455 m. He breaks up the journey into 5 equal stages. How far does he travel in each stage ?
- 33). Steven Snail likes to crawl 12 mm at a time and then have a break. He does this 9 times. How far has he crawled in total ? (Give your answer in centimetres and millimetres).
- 34). Alex measures her height at 97 cm. Four years later she measures herself again. She is now 1 m 34 cm. How much taller has she grown in this time ?
- 35). A small keg of beer has 9 l 500 ml in it. After a night of drinking it has only 5 l 670 ml in it. How much has been drunk during the evening ?
- 36). Jane has a car weighing 5600 Kg. What is this weight in tonnes and kilograms ?
- 37). Lynne has 3 l 912 ml of cola. She shares it equally between herself and 5 friends. How much does each person get ?
- 38). A 6 m 47 cm beech tree is struck by lightening. It loses the top 1 m 70 cm of its height. How tall is the beech tree now ?
- 39). A bowl holds 4 l 205 ml of water. Two and a half litres are spilt. How much water is left in the bowl ?
- 40). Tim measures the length of his exercise book as 18 cm 2 mm. He put 5 similar sized books end to end. How far will they stretch ?

## Walk the Plank.

Blackbeard has captured both of you. Only one player can survive.

You are both are 1 metre 67 cm away from the end of the plank and facing certain doom.

Roll the two dice and add them up. Say the distance you are from the end.

If you are right, move that number of centimetres along the plank.

at the distance from the end wrong you have to move another 20 cm nearer to the end !

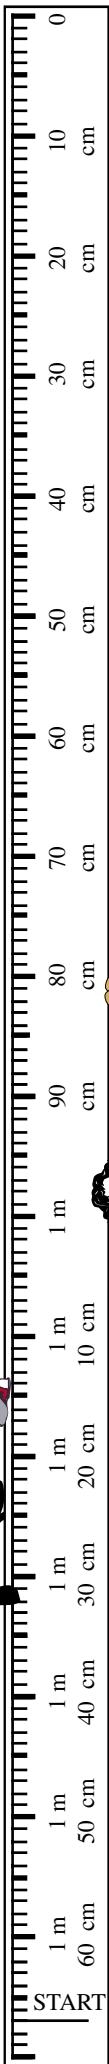

The loser falls off into shark infested waters and becomes fish food.

The two planks drawn out below may help your calculations.

## Raise the Tiny-Tanic.

The race is on to see who can raise their Tiny-Tanic first.

Both players start at 917 ml.

The first player to raise their Tiny-Tanic to 1 l 200 ml  
is the winner.

Take it in turns to roll two dice.

**Multiply** the two scores together.

**Add** this on to the level you are at.

If you make a mistake you go down 50 ml.

The two measuring cylinders are  
there to help your calculations.
