

CHILD DEVELOPMENT

Year 11

How I'll be assessed...

- Formative:** Retrieval questions, exam practice questions, quizzes
- Summative:** End of topic test

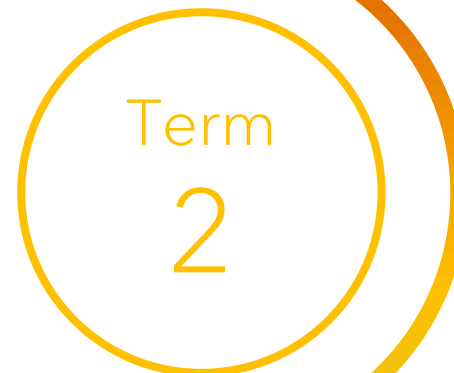

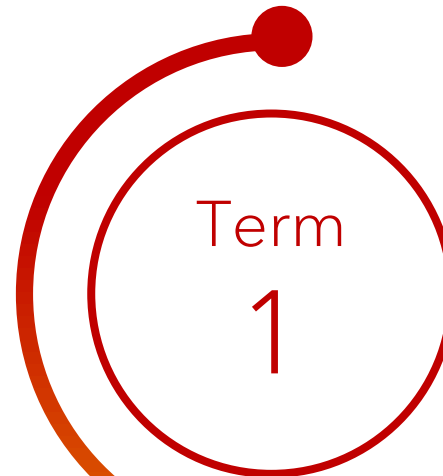

Unit R057: Health and well-being for child development

Topic Area 1: Pre-conception health and reproduction. They will learn about the factors affecting pre-conception health, types of contraception, the structure and function of the reproductive systems, and the process of reproduction. Topic Area 2: Antenatal care and preparation for birth. They will study the purpose and importance of antenatal clinics, screening and diagnostic tests, antenatal (parenting) classes, choices available for delivery, the role of the birth partner, methods of pain relief, signs of labour, stages of labour, and methods of assisted birth.

How I'll be assessed...

- Formative:** Retrieval questions, exam practice questions, quizzes
- Summative:** End of topic test

Unit R058: Create a safe environment and understand the nutritional needs of children from birth to five years)

Completion of the final task (Task 4) of Unit R058: They will plan and prepare a feed or meal, follow safety and hygiene practices, and evaluate their own performance, including strengths, weaknesses, and suggestions for improvement. This will be done by October Half Term.

How I'll be assessed...

- Formative:** Retrieval questions, exam practice questions, quizzes
- Summative:** End of topic test

Unit R057: Health and well-being for child development

Topic Area 3: Postnatal checks, postnatal care, and the conditions for development, and Topic Area 4: Childhood illnesses and a child-safe environment. They will learn about postnatal checks and care, developmental needs of children, recognizing signs and symptoms of illness, meeting the needs of an ill child, and ensuring a safe environment for children.
